

GETTING STARTED

Below is a description of the download, licensing and materials available to help you get started using GENERATE.

GENERATE Support website

- Visit the [GENERATE Support](#) site to find most of the content listed in this document. Check back frequently for new and updated content!

Licensing

- You will need a license generated for your specific computer. Download and follow the instructions found on the Support site to create a machine-specific alphanumeric code which Frustum will use to create your license.

Installer

- Download the installer from this [link](#). Note that you must be online when running the installer.

Tutorials

- It is strongly recommended that all users go through these self-guided exercises which use the files also found on the Support site to walk through the basics of GENERATE. Please complete all the tutorials before trying your own data.

Sample Models

- Contains the sample data for the use with the tutorials

To get started:

1. After receiving the email from a Frustum team member authorizing you to use the application, follow the instructions, which begin by visiting the Support site
2. Follow the instructions for licensing [first](#), as this process can take 24-48 hours to receive the license file from Frustum Support
3. [Download](#) the GENERATE installer, which will be linked in the email you received
4. After following the licensing instructions and receiving the license file from Frustum, place it in the application installation directory
5. Download the tutorials and sample models and complete them in numerical order

For any feedback or technical support, email generate-support@frustum.com.

Thank you!

The Frustum Support Team
